

WOLF 36 / 50

WOLF – It's a completely new level of durability . WOLF blade is designed for use in the most demanding conditions for an extremely long time. Inside the steel and rubber layers lies its secret: Embedded steel inlays with tungsten-carbide tips, a material resilient that it allows the blade to endure even the toughest surfaces and remove snow effortlessly. It is the most durable snowplough blade in existence.

- ① Snow plough must be properly placed for blade replacement. (read manufacturer instruction manual)
- ② Place blade at right position.
- ③ Use combination of screw and self-locking nut to fix blade. (read manufacturer instruction manual)
- ④ **IMPORTANT:** USE ONLY SELF-LOCKING NUT ACCORDING TO SNOW PLOUGH MANUFACTURERS LIST FOR PROPER TORQUE.
